

LISI ZEJNULLAHU

Full Stack Engineer | Laravel · React · Node.js

Brooklyn, NY | lisezejnullahu24@gmail.com | 347-371-4523

github.com/lisezejnullahu | linkedin.com/in/lisezejnullahu

SUMMARY

Full Stack Engineer with 3 years of experience delivering Laravel, React, and Node.js solutions. Shipped national e-government portals and SaaS platforms, consistently optimizing load times from tens of seconds to under one. Proven track record turning product ideas into maintainable, revenue positive applications.

EXPERIENCE

Freelance and Contract Full Stack Engineer

Various Clients | Sep 2023 – Present

- Developed a multi-tenant booking and scheduling SaaS (Laravel, Next.js, Stripe, RBAC) with real time scheduling and automated CI/CD via GitHub Actions.
- Integrated Firebase Cloud Messaging into Laravel backend to improve client support response time.
- Led SEO and analytics overhaul for an e-commerce site, significantly boosting organic traffic.

PONT

Full Stack Developer | Jul 2024 – Sep 2024

- Integrated a third-party DateRangePicker into a React/TypeScript scheduling interface, added custom navigation controls, and enabled automatic data reload on date-range selection.
- Created reusable React Query hooks to paginate, filter and fetch event and order data via parameterized API calls.
- Refactored core React components by consolidating props, removing redundant logic, and adding full i18n support for dynamic section headings.
- Containerized an authentication microservice with Docker Compose and optimized Git branching strategy to streamline feature development and CI/CD delivery.

BBros L.L.C

Web and Mobile Developer | Aug 2023 – Feb 2024

- Refactored React Native codebase, reducing bundle size and achieving Lighthouse performance scores in the 90s.
- Added MySQL indexing strategies, lowering query costs and improving API response time.
- Shipped a push notification feature, boosting weekly active users.

INSITECH

Full Stack Developer | Mar 2022 – Aug 2023

- Launched three React/Next.js/Node.js-based government portals serving millions of citizens; optimized caching and queries to reduce average response time from over 30s to under 1s.
 - Containerized legacy .NET services with Docker and GitHub Actions, improving deployment processes.
 - Built a Laravel Sanctum + Redis real-time messaging hub, reducing internal email load.
 - Interactive maps: Utilized Leaflet.js to create interactive maps with layered data visualizations.
-

TECH PROJECTS

Role-Based Waitlist Platform

Next.js 14 · NestJS · Laravel · Docker

- Waitlist and appointment system with drag-and-drop, real-time updates (Socket.IO), Stripe payments, and Swagger-documented APIs.
- Runs as Dockerized microservices on DigitalOcean.

Puppy Spa Waitlist

Next.js 14 · NestJS · Zustand

- Mobile-first dashboard for grooming salons with drag-and-drop waitlists and JWT auth.
 - Reduced daily check-in workflow from several minutes to under one per client.
-
